## RESEARCH INTEREST

---

Retrieval-Augmented Generation, Embedding Model, Large Language Model, NLP

## EDUCATION

---

Korea Advanced Institute of Science and Technology (KAIST)

M.S. in Data Science

Aug. 2020 – Jul. 2022

Advisor: Uichin Lee

Handong Global University (HGU)

B.A. Mathematics and Statistics & B.A. Management (Double-Major)

Mar. 2014 – Jul. 2020

*Summa Cum Laude*

## PUBLICATIONS

---

## EXPERIENCE

---

### Work Experience

Machine Learning Engineer

KPMG

Aug. 2024 – Present

Machine Learning Engineer

Okestro

Sept. 2022 – Aug. 2024

### Academic Experience

Interactive Computing Lab

KAIST

Advisor: Uichin Lee

Aug. 2020 – Jul. 2022

Technological entrepreneurship Lab

HGU

Advisor: Doohee Chung

Aug. 2018 – Jul. 2020

Mathematics and Statistics major Advisor: Heonjoo Kim	HGU <i>Aug. 2019 – Feb. 2020</i>
Business Information Technology Practice (Teaching Assistant) Advisor: I-Soo Joe	HGU <i>Mar. 2018 – Jul. 2018</i>
Principles of Accounting (Tutoring for foreigner) Advisor: Hyunmo Sung	HGU <i>Sept. 2017 – Dec. 2017</i>

## Other Experience

Mentor, Vision in Calling   HGU	<i>Mar. 2020 – Jul. 2020</i>
Director, Dep. of General Affairs, Student Government   HGU	<i>Dec. 2019 – Jul. 2020</i>
Director, Technological entrepreneurship Lab   HGU	<i>Jul. 2019 – Feb. 2020</i>
Executive, Residential College of International Dormitory   HGU	<i>Jul. 2019 – Feb. 2020</i>
Manager, Handong English Camp   HGU	<i>Mar. 2018 – Sept. 2018</i>
Instructor Education Certification for foreigners   HGU	<i>Mar. 2018 – Jun. 2018</i>
Accountant, International freshmen orientation   HGU	<i>Mar. 2017 – Aug. 2019</i>
English Teacher, Global Vision Christian School   GVCS)	<i>May. 2017 – Sept. 2017</i>

## PROJECTS

---

<p><b>Transforming Industries with AI: A Comprehensive AI Platform</b></p> <p>We are currently engaged in the development of a comprehensive AI platform that integrates cutting-edge technologies such as chatbot, data visualization, and specialized data analysis for the manufacturing sector. Our chatbot system is designed to handle queries across a wide range of domains, providing accurate and context-aware responses. The visualization system identifies user intent through conversational input and presents relevant charts using various visualization tools. Through this platform, we aim to deliver a robust solution that addresses diverse industry needs while driving efficiency and innovation.</p>	KPMG <i>Aug. 2024 – Present</i>
<p><b>Create an LLM model for RAG system</b></p> <p>Large language model(LLM) for Korean specialized in high-performance retrieval-augmented generation is rare. We created Korean LLM specialized for RAG using Orion-14B as a foundation model. A total of 800,000 data were selected from the AI hub. This data was refined and GPT-4 was used to create 8,000 high-quality RAG training data. We used data distributed parallel(DDP) to train multiple A100 GPUs in parallel and utilized the low-rank adaptation of large language models(LoRA).</p>	Okestro <i>Feb. 2024 – July. 2024</i>
<p><b>Korean Embedding Model Pipeline in Closed Network RAG System</b></p> <p>We are working on a project to secure a high-performance Korean embedding model. We researched several baseline Korean embedding models on the huggingface. We automated the construction of a dataset for embedding model fine tuning. We are working on how to generate answers that can give trust to us we were able to have a Korean embedding model with significantly better performance than the text-ada-embedding-002 provided by OpenAI.</p>	Okestro <i>Jan. 2024 – July. 2024</i>
<p><b>Deploying chatbot service specific to cloud domain</b></p> <p>We are developing Chatbot specific to cloud domains using Retrieval-Augmented Generation (RAG) systems. Through this, we can primarily handle product-related inquiries from in-house customers. We are working on how to generate answers that can give trust to users in the RAG system.</p>	Okestro <i>June. 2023 – July. 2024</i>

## FAQ Classification

We present a model that uses BERT and contrastive learning to automatically classify users' inquiries. The model eliminates the need for users to have domain knowledge or for administrators to classify multiple inquiries. This can significantly improve the efficiency of the inquiry management system, reduce the workload of users and administrators and enhance the overall user experience.

Okestro  
*Mar. 2023 – June. 2023*

## Log-Level Anomaly Detection

We present FineLog, a log message-wise anomaly detection framework that enables anomaly detection for each log message in the context of a given sequence. This study shows that FineLog not only records high performance in the existing sequence unit anomaly detection, but also records high performance in log unit anomaly detection.

Okestro  
*Mar. 2023 – June. 2023*

## Baseline of SWOT Classification

We present baseline indicators by introducing BERT model, which is widely used in the natural language processing field, for the first time in SWOT analysis. Starting with this approach, the baseline indicators of this study are expected to be useful for business intelligence cloud platforms that can be easily accessed by all stakeholders through deep learning of SWOT analysis.

Okestro  
*Sept. 2022 – Dec. 2022*

## Automation of Company SWOT Analysis Using Sentence BERT

This study presented SWOT Sentence BERT as an AIaaS model that can intellectually automate company SWOT analysis. The SWOT Sentence BERT is a sentence embedding model that is learned through SWOT text data processed in the form of natural language inference task. In order to automate SWOT analysis, we applied K-Means clustering algorithm to make clusters with sentence embeddings and classified sentence embeddings based on their predicted clusters.

Okestro  
*Sept. 2022 – Dec. 2022*

## Emotion Recognition (Master Thesis)

In this study, we propose a method for predicting the emotions of the speaker in the naturalistic conversation using a speaker encoder and counterpart encoder composed of CNN-LSTM deep learning networks. We used emotion-related data called K-EmoCon collected during the debate process to empirically evaluate our model. The results showed that the counterpart's speech and the physiological signals had a positive impact on predicting the speaker's emotions.

KAIST  
*Oct. 2021 – July. 2022*

## Video & Speech synthesis

We produced AI Human through voice conversion using StarGAN-VC and image synthesis using FSGAN. Through the process of analyzing various voice conversion models(CycleGAN, StarGAN-VC, StarGAN-VC2), we improved the quality of voice conversion by analyzing loss terms, number of domain classes, batch size, and iteration. In addition, the average similarity between the source video and the target video was used to facilitate video synthesis.

Deepbrain AI  
*Sept. 2021 – Oct. 2021*

## Digital Therapeutics (DTx)

We develop fundamental technologies of data-driven digital therapeutic, receptivity optimization for mobile digital therapeutic development. Furthermore, we analyze the effectiveness of digital treatments by applying causal analysis.

KAIST  
*Aug. 2020 – Sept. 2021*

## Contact Tracing

We develop risk scoring algorithms that can be used for analysis to detect BLE contact between client devices. In addition, the need to introduce a place beacon is increasing as the number of cases infected with COVID increases just by staying in the same place without having to contact the confirmed patient directly. We also identify the coverage that place beacon can effectively send and receive signals with client devices.

KAIST  
*Aug. 2020 – Dec. 2020*

## AWARDS AND HONORS

---

Best Paper Award (Korean Institute of Information Technology Paper Competition)	2022
President Award (Top 10 World-changing Projects)   HGU	2020
Best Paper Award (National Technology Policy Paper Competition)   IITP & KOTIS	2019
Best Paper Award (Korea Society for Innovation Management & Economics Paper Competition)	2019
Academic Top Scholarship for Seniors   HGU	2019
Academic Excellence Scholarship for Juniors   HGU	2018
Academic Excellence Scholarship for Sophomores   HGU	2017
Academic Excellence Scholarship for freshmen   HGU	2016
